WORK EXPERIENCE

Test Automation Engineer

Luday AB

07/2024 - 01/2025,

Gothenburg

Project Synopsis

Luday AB – Ludacards Web & Mobile Automation Worked on Ludacards, a web application that enables users to link multiple social media accounts and share content seamlessly. I developed automated test cases for both web and mobile platforms using Detox and integrated these into the CI/CD pipeline. I was responsible for test strategy, regression testing, bug tracking, and collaboration with cross-functional teams to ensure feature quality.

- Participate in business requirement meetings and ensure the features are testable and have relevant information.
- Created and maintained test strategy and detailed test documentation and test data for the existing and upcoming features
- Involved in ticket testing manually and created the regression tests suite and cases on Xray.
- Collaborated with developers, designers, and product owners to ensure quality delivery.
- Conducted and participated in Regression testing at the end of each sprint
- Used Jira as project management tool and Azure devops for continuous integration and delivery
- Used AI tools like ChatGPT for expedited test automation scripting and manual test case creation.
- Responsible for automation testing for Ludacards, a web app integrating social media platforms for one-click sharing.
- Developed scalable and reusable automated test scripts to validate workflows and user interactions.
- Identified and reported UI inconsistencies, functional defects, and performance issues with detailed bug reports.
- Set up and configured Robot framework for web test automation and integrated it with CI.
- Responding to customer queries and technical issues via email and support channels, ensuring timely resolution and satisfaction.
- Maintained a knowledge base and FAQ documentation to reduce repetitive queries.

Quality Assurance Specialist Intern

Nordic Stone Studio

01/2024 - 03/2024,

Stockholm

Nordic Stone Studio – Game Testing for Tile Cozy

Worked on Tile Cozy, a casual game developed for mobile platforms. I was responsible for responsiveness across various devices. Collaborated closely with game developers and designers to validate animations, transitions, and level performance. Used Appium for mobile automation and performed cross-device testing to ensure functionality and performance across both Android and iOS.

- Tested Tile Cozy, a mobile casual game, for gameplay functionality and user experience across platforms.
- Performed ticket testing manually and conducted Regression testing at the end of each sprint
- Involved in cross-device testing for animations, transitions, and level logic.
- Created automation scripts using Selenium, Appium for mobile testing.
- Used Postman for API Testing and its automation.
- Participated in Agile ceremonies, sprint planning, and QA reviews with developers and designers.

- Reported bugs related to gameplay, UI/UX, and performance across Android and iOS devices.

Software Test Engineer

IT Divine

01/2020 - 03/2023,

India

IT Divine – QA for Polco Engineering Protection Platform

Worked on end-to-end testing of Polco Engineering's Manufacturing and logistics platform that supported B2B and B2C operations. The system handled everything from product catalog management to order processing, payment gateway integrations, and shipment tracking.

- Designed and executed **manual and automated test cases** for order workflows, product pages, cart/checkout, and delivery tracking.
- Performed **API testing** using **Postman**, including validation of request/response, headers, error handling, and authentication.
- Executed **integration and regression tests** across modules involving ERP touchpoints and warehouse logistics.
- Developed and maintained **automation scripts using Playwright** for UI tests across browsers.
- Built and maintained CI/CD pipelines using Azure DevOps.
- Managed **test planning, defect tracking, and sprint documentation** using Jira and TestRail
- Collaborated closely with developers and product owners for **release planning and requirement refinement**
- Used SQL for validating backend data during testing
- Participated in Agile ceremonies: daily stand-ups, sprint planning, reviews, and retrospectives.

SKILLS

- **Testing Tools:** Selenium, Appium, Postman, Robot Framework, Detox, Playwright
- **Programming Languages:** Python, JavaScript/TypeScript, Java, HTML
- **DevOps/CI-CD:** Azure DevOps, GitHub Actions, Jenkins
- **Agile & Project Tools:** Jira, TestRail, Confluence
- **API & Messaging:** REST APIs, Azure Event Hubs
- **Others:** Troubleshooting, Exploratory Testing, Risk Identification

EDUCATION

Bachelors' in C.Engineering

Banasthali University, Rajasthan, India

2016-2020

CERTIFICATES

- **ISTQB** Certification
- D-Level Certification in **Swedish** Language
- Agile certification & Scrum Master Certification

INTERESTS

- Reading novels and articles on the latest technologies
- Badminton

LANGUAGES

- English and Swedish
