SUMMARY

Cybersecurity and IT expert with more than 30 years of experience, expertise in penetration testing, cloud security, and DevSecOps. Certified Ethical Hacker, CISSP, and OSCP, with solid experience in secure software development, security automation, and threat reduction. Well-skilled to build and execute secure, automated, and scalable IT infrastructures. Presently adapting deep knowledge in cybersecurity into DevSecOps and infrastructure security with emphasis on cloud security, compliance, and risk management.

EXPERIENCE

Founder and Chief Security Consultant

Ligti Media

2015 – Present

- Directed cybersecurity consulting for various clients, with an emphasis on penetration testing, DevSecOps, and threat mitigation.
- Automated vulnerability scanning, SIEM integration, and compliance scanning.
- Performed incident response and digital forensics investigations..

Founder and Security Architect

Ligti IT

2014 – Present

- Designed secure cloud infrastructures using Terraform and Kubernetes.
- Developed CI/CD pipelines with security controls integrated for DevSecOps deployment.
- Directed cybersecurity training for development and IT operations teams..

Full-Stack Developer and Security Expert

Digital Future Nordic

2012 – 2014

- Merged secure coding principles into software development processes.
- Created automated deployment and security monitoring pipelines.
- Performed penetration tests and applied threat modeling techniques..

Sales Development Representative

Leedly

May 2024 – Present

- Interacted with prospective clients to create and qualify leads for cybersecurity solutions.
- Fostered close relationships with IT security and DevOps stakeholders.
- Worked with sales and technical teams to match security offerings with client requirements..

PROJECT

Enterprise Kubernetes Security Implementation

- Drove containerized app security using Docker and Kubernetes.
- Applied RBAC, network policies, and least privilege access..

Cloud Infrastructure as Code Security

- Developed Terraform-based cloud security infrastructure with compliance automation.
- Implemented automated security controls and threat monitoring.

Cybersecurity Training and Awareness

- Executed executive security awareness programs and DevSecOps training for engineering teams.
- Built custom penetration testing labs for hands-on security training..

Automated Cloud Security Pipeline

- Created an automated CI/CD pipeline with security scans like SonarQube, Trivy, and SAST/DAST.
- Enforced OWASP compliance and saved 40 percent of the deployment time..

EDUCATION

High School Diploma

Gustaf Adolfsskolan • 1998

CERTIFICATIONS

Certified Information Systems Security Professional
2019

Offensive Security Certified Professional
2020

Certified Ethical Hacker
EC-Council • 2018

SKILLS

DevOps and Automation: Jenkins, GitLab CI/CD, Ansible, Terraform

Programming: Python, Bash, Java, JavaScript

Cloud Platforms: AWS with EC2, IAM, S3, and Lambda; Azure with AKS and DevOps; GCP

Languages: Swedish (Mother tongue), English (Proficient), Danish (Basic)

Security Tools: Nmap, Metasploit, Burp Suite, Wireshark, Nessus
